

CW-501

Control Scale, corrosion in cooling tower

CW-501 Special formulation for protects cooling tower system from scale, corrosion and sludge. Reduce mineral scale build up in heat exchanger system, reduce downtime for maintenance and cost down.

Area of Application

- ◆ Content anti scale, keep heat exchanger system cleaner.
- ◆ Content rust and corrosion inhibitor, prevention from rust and pitting on metal surface.
- ◆ Reduce mud and clay in cooling tower system
- ◆ Can use in general water supply
- ◆ Direct to use to sump water tank
- ◆ Reduce downtime , dosing to water system at 1: 5000 of water bleed off
